Risk Management Premium Credit - Training FAQs

Will I be notified when we have achieved our credit?

On the date of your deadline to complete training United Educators will inform your primary insurance contact via email whether or not you have earned the premium credit. We highly recommend that your institution run completion reports to monitor training progress towards achieving the Risk Management Premium Credit (RMPC).

Do I need to inform United Educators when we have completed training?

If you are conducting group training or are training on your own LMS through a license agreement, you are responsible for providing completion records to UE.

Otherwise, United Educators will confirm your qualification status at the deadline for achieving the credit. You may provide records of your training to us if you wish for us to validate and award the credit in advance of the program deadline.

Can existing training be used to qualify my school for the Risk Management Premium Credit?

The RMPC program is a yearlong engagement to mitigate risk requiring additional participation beyond purely online training. However, if your training falls under one of the eligible categories and was not used to earn credit in a previous year, it may be possible to apply that training towards earning your credit.
